

Discharge Planning Worksheet for Inpatients Receiving Mental Health Treatment

To be completed by the provider

Pa	tient name: Date:
D(DB/Medical Record #:
	Ask the patient if they would like to identify a family member, friend, or other support person ("lay caregiver") who will provide assistance to the patient following their discharge from the hospital. Particularly vulnerable patients, such as those hospitalized for mental illness should be encouraged to designate a support person to aid in their post-discharge care. If a lay caregiver is identified, note the designation in the patient's medical record. □ For a patient who is younger than 14 years of age, the lay caregiver is a parent or legal guardian of the patient. □ For a patient who is younger than 18 years of age but at least 14 years of age, the lay caregiver is the patient's parent or legal guardian unless the legal guardians refuse or there are clear clinical indications to the contrary such as sexual abuse by the guardian or evidence of emancipation. To the extent a legal guardian is not designated as the lay caregiver due to clinical indicators, those reasons should be noted in the medical record A patient aged 14 to 18 may also designate a lay caregiver of their choice.
	Lay Caregiver Name:
	Relationship to Patient:
	If a lay caregiver is identified, encourage the patient to sign an authorization to disclose relevant protected health information. Note in the medical record if patient authorization is obtained. Information to share with the patient and lay caregiver prior to discharge should include, but need not be limited to: The hospital's criteria and reasons for initiating discharge. The patient's diagnosis, treatment recommendations, and outstanding safety issues. Risk factors for suicide and what steps to take if danger exists, such as ridding the home of firearms/other means of self-harm and creating a plan to monitor and support the patient. The patient's prescribed medications including dosage, explanation of side effects, and process for obtaining refills, as applicable. Available community resources including case management, support groups, and others. The circumstances under which the patient or lay caregiver should seek immediate medical attention.
	Conduct a risk assessment of the patient's risk of suicide. □ Providers should seek input from the patient's designated lay caregiver, including interviews and patient history. □ Providers may accept unsolicited information from family and friends not authorized for disclosure.

Conduct a needs assessment to understand the long-term needs of the patient. The assessment include questions regarding the patient's income, housing situation, insurance, and					
	aftercare support, among others. The lay caregiver should be included in this conversation. At				
	minimum, the assessment should help the provider determine: The patient's capacity for self-care, including but not limited to:				
			-	_	Alfin Alim Almonials

	As necessary, provide instructions or training to the patient and lay caregiver prior to discharge. Instructions should address how to provide assistance to the patient and may include securing and administering medications, safety plans, name and location of follow-up appointment and community resources, or any other anticipated assistance relating to the patient's condition.				
	□ Notify the designated lay caregiver in advance of patient discharge or transfer.
